

PRODUCT GUIDE

-the dodil-dildo

The perfect dildo.

You are constantly changing and yet you remain unique.

You can continuously change the dodil to become your perfect dildo.

Unique as you are.

Heat.
Play.
Love.

To create your perfect dildo you put the dodil in hot water. Soon it becomes soft, squishy and very pleasing to handle. Now you can knead, squeeze and bind it into any shape you desire. When cooled it turns rigid in the design you have made. Repeat and reheat for new designs and new sensations.

GENERAL INFORMATION

In this guide we have gathered as much information as possible regarding our product “the dodil-dildo”. Please take a few minutes to read through it and use it, or our website: www.thedodil.com, as your first source of information before contacting us.

CUSTOMIZABLE

The dodil-dildo is the world's first and truly customizable dildo where the user has the power to shape their own perfected dildo-design by using their hands. All to fit their anatomy and fantasy. And more amazing is that you can do it over and over again. Practically a new design whenever you desire or for finding that perfect dildo that you stay with.

SUSTAINABLE

By having a core of a so called bio-thermoplastic the dodil-dildo is about 90% biodegradable (volume weight). Making it the most ecofriendly silicone covered dildo in the world.

UNIQUE PACKAGING

When selling the complete kit our unique and beautiful steel thermos flask is included by being the packaging, a heating vessel and secret hideout for the dodil. It draws the attention whether it is placed on a shelf in a shop or in a product image.

LIKEABLE

We are an inclusive company, based on Swedish core values of friendship, equal rights and the environment. By such we strive to educate, learn and empower by presenting products with the outmost care for people and the nature.

CONSTRUCTION AND MATERIALS

The dodil-dildo is built by having a unique liquid silicone formula which makes for the stretchy cover and a thermoplastic core that reacts to heat.

All together it makes for the incredible patented and patent pending (PCT) technology which makes you able to shape and reshape it.

Also inside the dodil-dildo there is an ABS-plastic handle for stability with our 'd'-icon in the back end.

Total length: 187 mm / 7.35 in. (135 mm / 5.31 in. moldable)

Diameter: 39 mm / 1.53 in.

Weight: 220 gram / 0.475 lbs

100% body-safe

100% non-toxic

100% bio-degradable core*

(*~90% of the total volume weight)

QUALITY ASSURANCE

We take pride in selling a quality product. Malfunction in the dodil-dildo due to manufacturing might happen, but are held at the lowest possible by having a 6-tier product quality control management system as per below:

1. Silicone stretch cover, factory
2. Fitting and assembly, factory
3. Structural & surface control, factory
4. Structural & surface control, warehouse
5. UV-light scan, warehouse
6. Heat-test and sterilization (5-10% of the units from every batch), warehouse

Thanks to this our broken percentage is kept at below 1.5%.

We also have our durability "testers" which have survived getting heated and shaped ~400 times or more. In comparison to most of our customers, they usually find their own personal design in just 1-3 tries.

We welcome all feedback regarding quality as we strive for excellency in this area.

REPLACEMENT POLICY

Accidents do happen. An air-bubble gets missed in quality control, a customer not following the instructions or something gets damaged during shipping.

In the end it all comes down to the support and customer care. And by this we replace all damaged or broken dodil-dildos - provided we can get pictures and an explanation of how it broke.

You are welcome to direct any customer issues to us if you want (e-mail to hello@thedodil.com). This way we can continue to learn, tend to the users and how to avoid any future mistakes.

PRODUCT PACKAGING

SINGLE UNIT PACKAGING

The dodil-dildo as a single unit comes packaged in a labeled and graphic box with EAN/PLU-code. Inside the box is our instructional leaflet and a cord for shaping.

Material: Printed cardboard, reinforced structure

Size: 5x5x20 cm / 1.95x1.95x7.9 in

STORE LOCATOR

To be registered on our store locator please e-mail us at sales@thedodil.com with your specifications (address and website).

COMPANY HISTORY

The dodil is a company-owned brand from Sweden, with an additional PR and marketing office in Cologne, Germany. We are a solid team of people working in this company with the soft company core made of the two founders, Richard Almgren and Peter Gustavsson.

The dodil was brought to life in the fall of 2016 thanks to the inventor Richard Almgren, m.sc in Material Physics, getting a close to fanatic relationship to the core material, the thermoplastic. Bringing the material to a friend exclaiming the shape of the piece he brought resembled a dildo, they had a good laugh about it. Later that day, Richard woke up in the middle of the night, and the idea for the dodil-dildo was born. Some months later he teamed up with Peter Gustavsson, a friend from the past. Getting the interest from investors was never a problem, since friends hearing about it flocked to support and invest in this brilliant idea.

By such, the dodil-dildo and the brand 'dodil' is born out of friendship. And we continue to strive for friendship in all our ventures. From our contacts with distributors and retailers, reviewers/bloggers and media, down to the very last customer. We maintain excellent response times in our support and are always open for feedback and adding new features et c. Also, thanks to this focus on friendship we managed to hone the last steps of the dodil-dildo with help from the "expert consumers" aka bloggers/reviewers. At the moment we are racking up reviews as the sex toy of 2017 (and hopefully 2018 for those who haven't reviewed it yet).

We hope you will benefit from joining us, as a friend and as a business partner, reshaping the world of design, vaginal exploration and new sensations in the search for the perfect dildo.

Yours sincerely,

Team Dodil
